## EDUCATION

### University of California, Irvine

*Bachelor of Science in Computer Science, GPA: 3.4*

Irvine, CA

June 2019 – June 2021

### Glendale College

*Associate of Science in Mathematics, GPA: 3.7*

Glendale, CA

June 2016 – May 2019

## EXPERIENCE

### Undergraduate Researcher

July 2020 – September 2020

*UC Irvine Institute for Money, Technology, and Financial Inclusion*

Irvine, CA

- Utilized various web scraping tools/techniques such as Selenium, Scrappy, and BeautifulSoup to gather relevant data.
- Built and maintained twitter bots to serve as test subjects for how they contribute to the spread of dis- and misinformation.
- Co-authored a blog post published on The Consortium of Social Science Associations (COSSA), summarizing the modules and toolkits developed by the team.

### Undergraduate Researcher

September 2019 – June 2020

*National Science Foundation - UC Irvine Informatics/Data Science Lab*

Irvine, CA

- Presented findings to faculty concerning how community organizations use data to champion their cause and how this experience helped our team, as computer science students, to understand ethics in computer science.
- Performed case studies on non-profits and consolidated data into a database using FileMaker Pro.
- Co-authored a scholarly publication regarding ethics in computer science curricula and undergraduate experiences.

### Software Engineer, Full Stack Intern

June 2018 – September 2018

*Youth Policy Institute*

Los Angeles, CA

- Sustained and improved organization's website working directly with the product manager and lead developer.
- Produced and maintained a follow-up system for current and past fellows using MERN stack.
- Adopted MongoDB for data storage.

## PROJECTS

### COVID-19 mRNA Vaccine Degradation Prediction

October 2020 – December 2020

*UC Irvine Artificial Intelligence in Biology and Medicine*

- Used python, NumPy, Pandas, TensorFlow, Keras, and Sklearn to predict RNA molecules' likely degradation rates.
- Achieved maximal time efficiency with a combination of fast algorithms and quality hardware.
- Successfully completed the Kaggle competition with 80% prediction accuracy.

### Facing Digital Extremism in a Pandemic Modules/Toolkits

July 2020 – September 2020

*UC Irvine Institute for Money, Technology, and Financial Inclusion*

- Scraped Twitter, Reddit, Facebook, and other social media platforms for relevant data.
- Developed modules and toolkits, taught in undergraduate/graduate courses aimed to identify and combat dis- and misinformation.
- The modules and digital toolkit were promoted through events and social media channels, as well as shared with national organizations and other universities to address extremism in all its forms.

### Phoenix Robotics

January 2019 – May 2019

*Glendale College*

- Built a public service humanoid robot to guide students on campus.
- Utilized Arduino, Python, and Raspberry Pi for a functioning robot in a team of 15.
- Raised north of 20,000 USD for the project.
- Organized and held meetings for 15+ team members, lead an agile work environment.

### Timeliness - Time Management Application

June 2017 – September 2017

*Personal Project*

- Programmed a time management app using Swift.
- Coordinated the entire project from scratch.
- Designed and implemented the UI/UX using Sketch and Photoshop.

## SKILLS

**Programming:** Python, C/C++, JavaScript, R, Swift, Arduino, Git, pandas, NumPy

**Web:** React, HTML/CSS

**Languages:** English, Armenian, Farsi (Persian)
